DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 and 21-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the diffusion section" in line 6. There is insufficient antecedent basis for this limitation in the claim.

Claim 6 recites the limitation "the diffusion section" in line 6. There is insufficient antecedent basis for this limitation in the claim.

Claim 21 recites the limitation "the diffusion section" in line 9. There is insufficient antecedent basis for this limitation in the claim.

Claim 28 recites the limitation "the diffusion section" in line 8. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14,16,19-20,35-38 and 43-44 are rejected under 35 U.S.C. 102(b) as being anticipated by Ward (US Pat#s 5,713,923 and 5,978,702).

Ward discloses techniques of treating epilepsy that include identifying the site, selecting at least one or two catheters with a microporous section, placing the catheters in the organism, coupling the catheters to a pump, and actuating the pump. See figures 1 and 6. Each end of the microporous sections is connected to an end of a solid catheter section. See figure 6. This results in a solid cross section through any part of the distal region. The sold tube may be made from a radiopaque material. The pump may be implantable or external.

Allowable Subject Matter

Claims 15, 17-18 and 39-42 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 21-34 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
